A Cumulative Author Index of *Learning Disability Quarterly* 1978, *1*(1) - 1990, *13*(4)

George J. Haus, Keith W. Whinnery, and Herbert J. Rieth

This cumulative author index was developed as a service for the readers of *Learning Disability Quarterly*. It was prepared as a resource for scholars wishing to access the 554 articles published in the first 13 volumes of this journal.

Since many literature searches involve tracking authors across a program of studies and individual authors may not always be "first" authors, this index contains cross-references of all authors to each citation. In total, 1,163 author citations are included.

We hope that this bibliographic index will be of help to readers who wish to access trends, issues, and research on the education and understanding of individuals with learning disabilities.
